

Sample Travel Letter from Treating Doctor

To Whom It May Concern,

RE: *(Patient's name)*

This patient has a bleeding disorder called _____ indicating a deficiency (and/or malfunction) of factor _____. S/he is well known to me. If internal or external bleeding occurs, the patient responds well to early self-infused transfusions of anti-hemophilic factor plasma-derived or recombinant concentrates. _____'s *(patient's name)* judgement as to when these products should be used and as to the quantity may be relied upon.

Yours truly,

(Doctor's signature name, position)
